

## General Information - Paper Handling Module

### Paper Tray Heaters

There are two Paper Tray Heaters in the Paper Handling Module. Trays 1 and 2 share the same heater which is located under Tray 2 (see photo). The heater for tray 3 is larger and is located under the Tray 3 drawer. A Humidity Sensor located behind the Tray 3 Front Cover monitors the amount of humidity and notifies the control logic to switch on the heaters when the humidity is over 50% and switch off the heaters when the humidity is below 50%. A thermostat maintains the heat at a preset level while the heaters are on.
