

IBT Belt - IOT Module

IBT First Bias Transfer Rolls

There are four First Bias Transfer Rolls, one for each Drum. The First rolls are located underneath the IBT Belt and are positioned at the center of each Drums. The bias voltage applied to the rolls attracts the toner image as it transfers from the Drum to the IBT Belt. The Bias Transfer Roll power supplies are located next to each rolls. The rolls have a charge of 5.5kvdc, and an HFSI life of 400k.
