

Paper Tray 1 & 2 – Paper Handling Module

Tray 1 and 2 Paper Weight Selector Switch

The Tray 1 and 2 Weight Selector Switches are used to inform the control logic what weight paper is loaded in the selected tray. There are five weight ranges from 64 to 220 gsm. If the operator fails to set the correct paper weight the machine could have fusing, decurling and jamming problems due to incorrect paper handling settings. See next page for paper weight chart.
