Mode reminder

An appropriate label is sticked inside the keyboard small door as a reminder for the operator. The following picture is a view of this label.

Purge Tray Operation

Under the control of the FFIU, a paper-diverter can be activated to direct the paper to a purge tray located on the top cover of the unit.
The sheets are stacked in the order and orientation of their exit from the printer.

Stacking Operation

Under the control of the FFIU, the output paper diverter can direct the sheets to the stacking area.
The sheets are stacked in the order and orientation of their exit from the printer.

Note: purge sheets in Case A are also sent to the stack tray, operator must manually sort stack after purge.
