WorkCentre M24 V1.2 Software release notes
04/29/04

1. The WC M24 Tag 6 Install Instructions are for all M24 SW levels - Version 1.0 or 1.1 to Version 1.2
2. Fax Security Issue fixed
3. Option Device Detection for the paper tray type - new NVM to manually set Tray type. Refer to the document, **Option Device Detection**.pdf, in the **Doc** folder of this CD.
4. Scan to Email fix - When Scan to Email is performed on one-sheet document, a line with only line feed code will be output to email's subject, and depending on an email environment (especially the type of email server), contents of the email will be garbled.
