

## Service Bulletin

Issued by Canon Europa N.V.

**COPIER B/W**

**HARDWARE**

---

**Model:**

iR5570

iR6570

**Ref No.:**

iR6570-005

(F1-T01-0M5-10018-01)

**Date:**

August, 2005

---

**Location:**

Internal components (2)

**Subject:**

A preventive measure against the symptom that the image density is light, which is caused by misalignment and distortion in the Scanner Unit

**Detail:**

<Symptom>

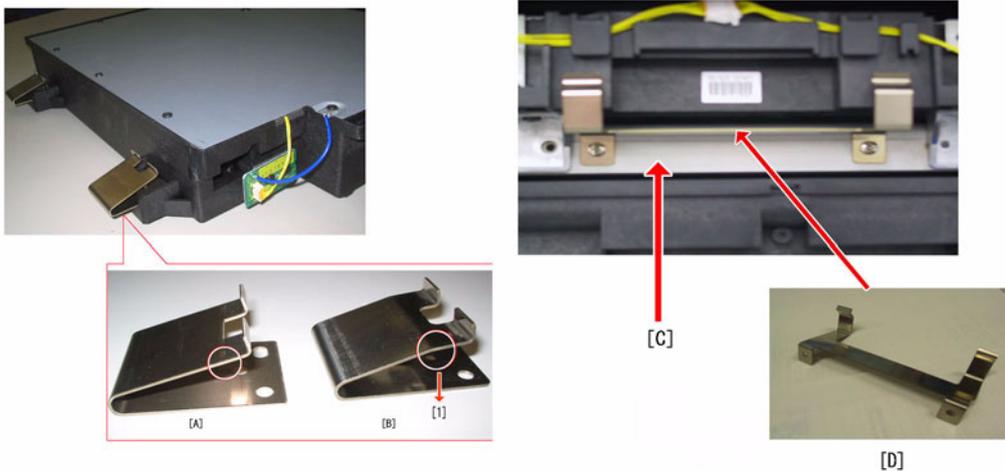

The image density is light.

<Cause>

Shock caused during transport of the Main Body and in other occasions creates a misalignment and distortion in the Scanner Unit which leads to the symptom that the image density is light.

<Factory Measures>

Change the shape of Pressure Spring, add holes for mounting the Leaf Spring to the Scanner Stay (R) [C] and fix the Leaf Spring [D] with cross-recess screws as to prevent the misalignment and distortion in the Scanner Unit. Stepped screws for mounting the Scanner Unit is discontinued.

- [A] Old Pressure Spring
- [B] New Pressure Spring
- [C] Scanner Stay (R)
- [D] Leaf Spring
- [1] A part of shape change (a bend added)

#### Service Work:

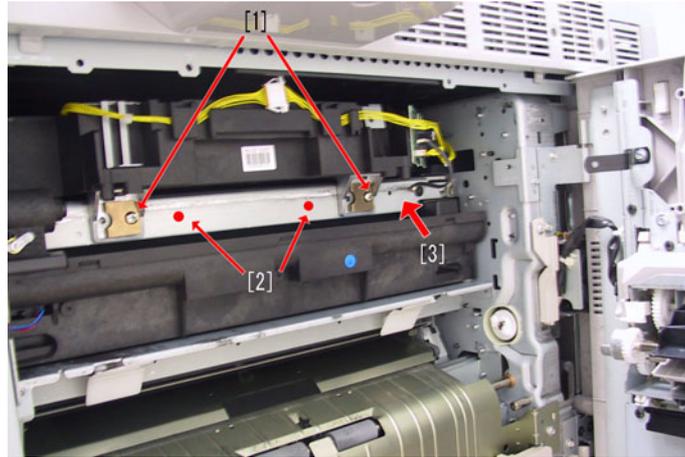

If the symptom occurs in the product A or B below, re-install the Scanner Unit. If the symptom is not solved, replace the Laser Scanner Unit by a new one. Be aware that the replacement should be done depending on the types of product.

Product type	A	B	C
Laser Scanner Assembly	Old	Old	New
Scanner Stay (R)	No screw hole	With screw holes	With screw holes
Leaf Spring	None	None	With the spring

-Product type A and B: Mount the Laser Scanner Unit by using stepped screws.

-Product type B: No need to use the Leaf Spring although it has holes for mounting the Spring.

-Product type C: If it is necessary to replace the Laser Scanner Unit by a new one, be sure that the Leaf Spring is be mounted.

- [1] Stepped screws which fix the Scanner Unit
- [2] Holes for mounting the Leaf Spring
- [3] Scanner Stay (R)
