Safety precautions

This booklet provides safety warnings and precautions for our service personnel to ensure the safety of their customers, their machines as well as themselves during maintenance activities. Service personnel are advised to read this booklet carefully to familiarize themselves with the warnings and precautions described here before engaging in maintenance activities.

Safety warnings and precautions

Various symbols are used to protect our service personnel and customers from physical danger and to prevent damage to their property. These symbols are described below:

 **DANGER:** High risk of serious bodily injury or death may result from insufficient attention to or incorrect compliance with warning messages using this symbol.

 **WARNING:** Serious bodily injury or death may result from insufficient attention to or incorrect compliance with warning messages using this symbol.

 **CAUTION:** Bodily injury or damage to property may result from insufficient attention to or incorrect compliance with warning messages using this symbol.

Symbols

The triangle () symbol indicates a warning including danger and caution. The specific point of attention is shown inside the symbol.

General warning.

Warning of risk of electric shock.

Warning of high temperature.

 indicates a prohibited action. The specific prohibition is shown inside the symbol.

General prohibited action.

Disassembly prohibited.

 indicates that action is required. The specific action required is shown inside the symbol.

General action required.

Remove the power plug from the wall outlet.

Always ground the copier.

1. Installation Precautions

WARNING

- Do not use a power supply with a voltage other than that specified. Avoid multiple connections to one outlet: they may cause fire or electric shock. When using an extension cable, always check that it is adequate for the rated current. 
- Connect the ground wire to a suitable grounding point. Not grounding the copier may cause fire or electric shock. Connecting the earth wire to an object not approved for the purpose may cause explosion or electric shock. Never connect the ground cable to any of the following: gas pipes, lightning rods, ground cables for telephone lines and water pipes or faucets not approved by the proper authorities. 

CAUTION:

- Do not place the copier on an infirm or angled surface: the copier may tip over, causing injury. 
- Do not install the copier in a humid or dusty place. This may cause fire or electric shock. 
- Do not install the copier near a radiator, heater, other heat source or near flammable material. This may cause fire. 
- Allow sufficient space around the copier to allow the ventilation grills to keep the machine as cool as possible. Insufficient ventilation may cause heat buildup and poor copying performance. 
- Always handle the machine by the correct locations when moving it. 
- Always use anti-toppling and locking devices on copiers so equipped. Failure to do this may cause the copier to move unexpectedly or topple, leading to injury. 
- Avoid inhaling toner or developer excessively. Protect the eyes. If toner or developer is accidentally ingested, drink a lot of water to dilute it in the stomach and obtain medical attention immediately. If it gets into the eyes, rinse immediately with copious amounts of water and obtain medical attention. 
- Advise customers that they must always follow the safety warnings and precautions in the copier's instruction handbook. 

2. Precautions for Maintenance

WARNING

- Always remove the power plug from the wall outlet before starting machine disassembly. 
- Always follow the procedures for maintenance described in the service manual and other related brochures. 
- Under no circumstances attempt to bypass or disable safety features including safety mechanisms and protective circuits. 
- Always use parts having the correct specifications. 
- Always use the thermostat or thermal fuse specified in the service manual or other related brochure when replacing them. Using a piece of wire, for example, could lead to fire or other serious accident. 
- When the service manual or other serious brochure specifies a distance or gap for installation of a part, always use the correct scale and measure carefully. 
- Always check that the copier is correctly connected to an outlet with a ground connection. 
- Check that the power cable covering is free of damage. Check that the power plug is dust-free. If it is dirty, clean it to remove the risk of fire or electric shock. 
- Never attempt to disassemble the optical unit in machines using lasers. Leaking laser light may damage eyesight. 
- Handle the charger sections with care. They are charged to high potentials and may cause electric shock if handled improperly. 

CAUTION

- Wear safe clothing. If wearing loose clothing or accessories such as ties, make sure they are safely secured so they will not be caught in rotating sections. 
- Use utmost caution when working on a powered machine. Keep away from chains and belts. 
- Handle the fixing section with care to avoid burns as it can be extremely hot. 
- Check that the fixing unit thermistor, heat and press rollers are clean. Dirt on them can cause abnormally high temperatures. 

- Do not remove the ozone filter, if any, from the copier except for routine replacement. 
- Do not pull on the AC power cord or connector wires on high-voltage components when removing them; always hold the plug itself. 
- Do not route the power cable where it may be stood on or trapped. If necessary, protect it with a cable cover or other appropriate item. 
- Treat the ends of the wire carefully when installing a new charger wire to avoid electric leaks. 
- Remove toner completely from electronic components. 
- Run wire harnesses carefully so that wires will not be trapped or damaged. 
- After maintenance, always check that all the parts, screws, connectors and wires that were removed, have been refitted correctly. Special attention should be paid to any forgotten connector, trapped wire and missing screws. 
- Check that all the caution labels that should be present on the machine according to the instruction handbook are clean and not peeling. Replace with new ones if necessary. 
- Handle greases and solvents with care by following the instructions below: 
 - Use only a small amount of solvent at a time, being careful not to spill. Wipe spills off completely.
 - Ventilate the room well while using grease or solvents.
 - Allow applied solvents to evaporate completely before refitting the covers or turning the power switch on.
 - Always wash hands afterwards.
- Never dispose of toner or toner bottles in fire. Toner may cause sparks when exposed directly to fire in a furnace, etc. 
- Should smoke be seen coming from the copier, remove the power plug from the wall outlet immediately. 

3. Miscellaneous

WARNING

- Never attempt to heat the drum or expose it to any organic solvents such as alcohol, other than the specified refiner; it may generate toxic gas.

1-2-1 Installation environment

1. Temperature: 10 to 32.5°C/50 to 90.5°F
2. Humidity: 15 to 80%
3. Power supply: 120 V AC, 12.0 A/220 to 240 V AC, 6.5 A
4. Power source frequency: 50 Hz $\pm 2\%$ /60 Hz $\pm 2\%$
5. Installation location

Avoid direct sunlight or bright lighting. Ensure that the photoconductor will not be exposed to direct sunlight or other strong light when removing paper jams.

Avoid locations subject to high temperature and high humidity or low temperature and low humidity; an abrupt change in the environmental temperature; and cool or hot, direct air.

Avoid places subject to dust and vibrations.

Choose a surface capable of supporting the weight of the machine.

Place the machine on a level surface (maximum allowance inclination: 1°).

Avoid air-borne substances that may adversely affect the machine or degrade the photoconductor, such as mercury, acidic or alkaline vapors, inorganic gasses, NOx, SOx gases and chlorine-based organic solvents.

Setting the white line correction

Description

Sets the error detection threshold value for white line correction and displays the count result of abnormal pixels.

Purpose

To perform when replacing the CIS, DP driver PWB or CIS roller.

Method: white line correction

1. Press the start key.

2. Press [EXECUTE].

3. Press the start key. Holding of white reference data is started.

4. The count result of abnormal pixels is displayed.

Display	Description
Calculation(R)	Abnormal pixel count result for color R
Calculation(G)	Abnormal pixel count result for color G
Calculation(B)	Abnormal pixel count result for color B

5. Press the system menu key.

6. Place a gray original on the DP with the gray side down. Load paper in the cassette.
The paper should be the same size as the original.

7. Press the start key.
Two test pattern sheets will be printed. (1st sheet: blank sheet, 2nd sheet: Approx. 60 mm black band)

8. If no vertical lines appear on either sheet, the setting has been completed normally.
If vertical black lines appear on the blank sheet and vertical white lines appear in the black band in the same position, clean the CIS roller and the CIS glass and then repeat white line correction.
If vertical black lines or vertical white lines appear on both sheets, white line correction has been completed normally. However, the cause of the vertical lines lies in the engine, and thus the engine must be checked.

How to view test copies

blank sheet	black band	Causes	Corrective measures
No lines	No lines	-	Complete
Black lines	White lines	Dirty CIS roller or CIS glass	Clean CIS roller or CIS glass and then perform U091 again
Black lines	No lines	Engine side	U091 ends, check engine
No lines	White lines	Engine side	U091 ends, check engine

Setting: Threshold value setting

1. Select the item to be set.

2. Change the value using the +/- or numeric keys.

Display	Description	Setting range	Initial setting
Threshold(R)	Displaying of abnormal pixel detection threshold value for color R	-	-
Threshold(G)	Displaying of abnormal pixel detection threshold value for color G	-	-
Threshold(Com)*	Setting of abnormal pixel detection threshold value for color	0 to 1023	112
Abnorm Pixel Threshold	Abnormal pixel threshold value setting	0 to 8191	75
MODE	Switching between white line correction mode ON/OFF	0: OFF/1: ON/ 2: Test mode	0

*: Normally the Threshold (Com) value should not be changed from 112, the initial setting.

If white lines appear even though the CIS roller and glass are not dirty, raise the set value.

If fine lines in some originals disappear, lower the set value.

Set within the range 50 to 200. (If set outside this range, the image may be affected.)

Setting for toner applying operation

Description

Sets the mode for removing charged toner in the developing unit (T7 control: Toner applying operation).

Purpose

Changing settings are not required. However, when the documents with lower print density (e.g. less than 2%) should customarily printed in a great volume, mode must be changed.

If the charged toner stays inside the developing unit, density decreases.

Method

1. Press the start key.

2. Select the item to be set. The setting screen for the selected item is displayed.

Display	Description
Transition Time	Duration of toner applying
Set Operation Mode	Settings for toner applying operation
Upper Limit	Upper limit printing ratio of toner applying quantity with each mode
Sleeve Cleaning	Toner collection operational interval on developing sleeve after the toner applying operation (T7 control)
Set Drum Cleaning Mode	Settings for developing the toner layer in accordance with coverage ratio
Set Minimum Value	Toner layer width when [Set Drum Cleaning Mode] is selected

Setting: [Transition Time]

1. Change the setting value using the +/- or numeric keys.

Display	Description	Setting range	Initial setting

1-4-2 Self-diagnosis

(1) Self-diagnostic function

This unit is equipped with a self-diagnostic function. When a problem is detected, copying is disabled and the problem displayed as a code consisting of C followed by a number, indicating the nature of the problem. A message is also displayed requesting the user to call for service.

After removing the problem, the self-diagnostic function can be reset by turning cover switch off and back on.

List of system errors

When an unexpected error is detected for some reason, a system error will be indicated. (When 0800 error is detected, JAM05 is indicated.) After a system error is indicated, the error can be cleared by turning the power switch off and then on. If the error is detected continuously, however, perform the operation shown in Table 1-4-1. If a system error occurs frequently, a fault may have occurred. Check the details of the C call to take proper measures.

1-5-1 Precautions for assembly and disassembly

(1) Precautions

Before starting disassembly, press the Power key on the operation panel to off. Make sure that the Power lamp is off before turning off the main power switch. And then unplug the power cable from the wall outlet.

Turning off the main power switch before pressing the Power key to off may cause damage to the equipped hard disk.

When the fax kit is installed, be sure to disconnect the modular code before starting disassembly.

When handling PWBs (printed wiring boards), do not touch parts with bare hands.

The PWBs are susceptible to static charge.

Do not touch any PWB containing ICs with bare hands or any object prone to static charge.

When removing the hook of the connector, be sure to release the hook.

Take care not to get the cables caught.

To reassemble the parts, use the original screws. If the types and the sizes of screws are not known, refer to the PARTS LIST.

Never connect or disconnect the signal cable of the DP when the power is on.

(2) Drum

Note the following when handling or storing the drum.

When removing the drum unit, never expose the drum surface to strong direct light.

Keep the drum at an ambient temperature between -20°C/-4°F and 40°C/104°F and at a relative humidity not higher than 85% RH. Avoid abrupt changes in temperature and humidity.

Avoid exposure to any substance which is harmful to or may affect the quality of the drum.

Do not touch the drum surface with any object. Should it be touched by hands or stained with oil, clean it.

(3) Toner

Store the toner container in a cool, dark place.

Avoid direct light and high humidity.

(4) How to tell a genuine Kyocera Mita toner container

As a means of brand protection, the Kyocera Mita toner container utilizes an optical security technology to enable visual validation. A validation viewer is required to accomplish this.

Hold the validation viewer over the left side part of the brand protection seal on the toner container. Through each window of the validation viewer, the left side part of the seal should be seen as follows:

A black-colored band when seen through the left side window

A shiny or gold-colored band when seen through the right side window

The above will reveal that the toner container is a genuine Kyocera Mita branded toner container, otherwise, it is a counterfeit.

Figure 1-5-1

The brand protection seal has an incision as shown below to prohibit reuse.

(1) Cassette paper feed section

Cassette paper feed section consists of the paper holder with the cassette operation plate activated by lift motor 1 and 2, and the pulleys, such as the forwarding pulley, the paper feed pulley and the separation pulley, for extracting and conveying the paper. Paper is fed out of the cassette by the rotation of the forwarding pulley, paper feed pulley and separation pulley.

Pressing the start key activates the MP solenoid (MPSOL) to release the paper stopper, which in turn causes the MP forwarding pulley mounted on the MP support to descend. In turn, the MP forwarding pulley comes in contact with the paper placed on the MP tray is fed forward as the MP forward pulley rotates and forwarded to the MP paper feed pulley and the MP separation pulley. Also during paper feed, the MP separation pulley prevents multiple sheets from being fed at one time by the torque limiter.

2-1-2 Drum section

(1) Drum section

The drum section consists of the charger roller unit, drum and cleaning section. The drum is electrically charged uniformly by means of a charger roller to form a latent image on the surface. The cleaning section consists of the cleaning blade and the cleaning roller which remove residual toner from the drum surface after transfer. The cleaning lamp (CL) consists of LEDs and removes residual charge on the drum before main charging.

The image data scanned by the CCD PWB (CCDPWB) is processed on the main PWB (MPWB) and transmitted from engine PWB (EPWB) as image printing data to the laser scanner unit (LSU). By repeatedly turning the laser on and off, the laser scanner unit forms a latent image on the drum surface.

2-1-5 Transfer/separation section

(1) Primary transfer section

There are four primary transfer rollers opposed to each color drum inside of transfer belt, toner on the drum is transferred to transfer belt by impressed bias voltage (minus). Remaining toner on the transfer belt is cleaned by fur brush.

(2) Secondary transfer/separation section

The secondary transfer/separation section consists mainly of the transfer (TC) roller and separation discharge plate. A high voltage generated by the transfer high voltage PWB 2 (THVPWB2) is applied to the transfer (TC) roller for secondary transfer charging. Paper after secondary transfer is separated from the transfer (TC) roller by applying separation bias that is output from the transfer high voltage PWB 2 (THVPWB2) to the separation discharge plate.

2-1-6 Fuser section

(1) Fuser section

The fuser section consists of the parts shown in figure below. When paper reaches the fuser section after the secondary transfer process, it passes between the press roller and melt belt. Pressure is applied by the fuser unit pressure springs so that the toner on the paper is melted, fused and fixed onto the paper. The melt belt is heated by fuser heaters 1 (FH1) or 2 (FH2) inside the heat roller. The press roller is heated by fuser heater 3 (FH3).

2-1-7 Eject/feedshift section

(1) Eject/feedshift section

The eject/feedshift sections switch the paper path based on the copy mode and eject paper or convey the paper to the duplex section or job separator. For duplex copy mode, the paper for which copying on the rear side has been completed is conveyed to the duplex section by the feedshift section operation.

When paper is ejected to the finisher or the job separator tray, the paper path is switched by rotation of the rotary guide to convey the paper into the job separator.

2-1-8 Duplex section

(1) Duplex section

In duplex mode, after printing on to the reverse face of the paper, the paper is reversed in the feedshift section and conveyed to the duplex section. The paper is then conveyed to the paper feed section by the duplex B roller and duplex A roller.

1. Pour vérifier le bon fonctionnement de l'appareil, préparer un original (a) sur lequel sont tracées 4 lignes (b) à 20 mm des bords de la feuille A3 et 1 ligne (c) en son axe.
2. Brancher la fiche d'alimentation du MFP sur la prise murale et mettre l'appareil sous tension.
3. Placer l'original (a) sur le DP et effectuer une copie de test pour vérifier le fonctionnement et l'exemple de copie.
4. Comparer l'original (a) avec l'exemple de copie. Si l'écart excède la valeur de référence, effectuer les réglages suivants en fonction du type d'écart.

Vérifier les images du DP après avoir contrôlé et réglé les images du MFP. Pour plus de détails, se reporter au manuel d'entretien.

AVIS: Si l'image est floue, régler la position de balayage de U068 du DP. Si la position de balayage de U068 est modifiée, régler la synchronisation du bord d'attaque de U071.

[Verifique el funcionamiento]

1. Para comprobar el funcionamiento del aparato, prepare un original (a) que contenga 4 líneas (b) dibujadas a 20 mm de los bordes de la hoja A3 y 1 línea (c) dibujada en el centro.
2. Conecte el enchufe eléctrico del MFP en el tomacorriente de la pared y encienda el interruptor principal.
3. Coloque el original (a) en el DP y haga una copia de prueba para verificar el funcionamiento y el ejemplo de copia.
4. Compare el original (a) con el ejemplo de copia. Si la separación supera el valor de referencia, realice los siguientes ajustes según el tipo de separación.

Compruebe las imágenes del DP después de comprobar y ajustar las imágenes del MFP. Para más detalles, lea el manual de servicio.

AVISO: Si la imagen estuviera borrosa, ajuste la posición de escaneo U068 del DP. Si cambia la posición de escaneo con U068, ajuste la sincronización de borde superior U071 del DP.

[Funktionsprüfung]

1. Zum Prüfen der Gerätefunktion das Original (a) vorbereiten, auf das 4 Linien (b) 20 mm von den Kanten des A3-Blattes und 1 Linie (c) in der Mitte gezeichnet sind.
2. Den Netzstecker am MFP in die Steckdose stecken und den Strom einschalten.
3. Das Original (a) auf den DP legen und eine Testkopie erstellen, um die Funktion und das Kopierbeispiel zu prüfen.
4. Das Original (a) mit dem Kopierbeispiel vergleichen. Wenn der Abstand größer als der Bezugswert ist, die folgenden Einstellungen gemäß dem Abstandstyp durchführen.

Die Bilder des DP nach dem Prüfen und Einstellen der Bilder des MFP prüfen. Weitere Einzelheiten siehe Wartungsanleitung.

HINWEIS: Falls das Bild verschwommen wirkt, ist die U068 DP Scan-Position zu verstellen. Wenn Sie die Scan-Position mit U068 verstellen, müssen Sie das U071 DP-Vorderkanten-Timing entsprechend verstellen.

11. Mientras presiona el carril de guía (D) en el finalizador de documentos (A) para que la separación entre el carril de guía (D) y el piso sea de unos 10 mm, asegúrelo utilizando dos tornillos de fijación M4 x 6 (E).

Nota

Si el carril de guía no está bien ajustado, el carril de guía puede no moverse cuando se separa el finalizador de documentos.

12. Asegure el carril guía (D) con dos tornillos de sujeción M4 x 6 (E) de forma tal que exista un espacio de aproximadamente 10 mm entre el carril y el piso.

Anbringen und Einstellen der Führungsschieneneneinheit

11. Die Führungsschiene (D) gegen den Dokument Finisher (A) gedrückt halten, so dass der Abstand zwischen der Führungsschiene (D) und dem Boden ca. 10 mm beträgt, und mit zwei M4 x 6 Befestigungsschrauben (E) sichern.

Hinweis

Falls die Führungsschieneneneinheit nicht korrekt eingestellt ist, bewegt sie sich beim Trennen des Dokument Finishers eventuell nicht.

12. Die Führungsschieneneneinheit (D) mit den beiden M4 x 6 Verbundschrauben (E) so sichern, dass ein Abstand von etwa 10 mm zwischen Schiene und Boden vorhanden ist.

Montaggio e regolazione della guida della rotaia

11. Mentre si tiene premuta la guida della rotaia (D) alla finitrice di documenti (A) in modo che lo spazio tra la guida della rotaia (D) e il pavimento sia di circa 10 mm, fissarla a mezzo di due viti di serraggio M4 x 6 (E).

Nota

Se la guida della rotaia non è regolata correttamente, potrebbe non muoversi quando il separatore la finitrice di documenti verrà staccato.

12. Fissare la guida della rotaia (D) con le due viti di serraggio M4 x 6 (E) in modo che ci sia una distanza di circa 10 mm tra la rotaia e il pavimento.

导向轨道的安装调整

11. 调整导向轨道 (D) 与地板之间的间距为 10 毫米左右, 将导向轨道 (D) 插入装订器 (A) 到底, 用两个 M4 x 6 固结螺钉 (E) 进行固定。

注意

如果不能正确调整导向轨道的话, 在分离装订器时, 可能会发生导向轨道不能移动的情况。

12. 用 2 个 M4 x 6 固结螺钉 (E) 将导向轨道 (D) 固定, 确保轨道和地面之间有约 10 毫米的距离。

ガイドレールの取付調整

11. ガイドレール (D) と床面の隙間が約 10mm になるように、ガイドレール (D) をドキュメントフィニッシャー (A) に突き当てながら、ビス M4 x 6 バインド (E) 2 本で固定する。

注意

正しく調整しないと、ドキュメントフィニッシャーの切り離し時、ガイドレールが動かない恐れがある。

12. ガイドレール (D) と床面の隙間が約 10mm になるように、ビス M4 x 6 バインド (E) 2 本で固定する。

13. Loosen temporarily the two screws (8) that secure the sheet metal (7) of the rail mounting plate (C) on the MFP, raise the sheet metal (7) by two divisions of the scale from the guide rail (D), and tighten the two screws (8).

Note

If the guide rail (D) is not adjusted correctly, it will not move and could cause the document finisher to fall over.

14. Slide the document finisher to engage it with the latch catch of the MFP. If the document finisher and the MFP do not engage securely, perform the following document finisher height adjustment.

13. Desserrer provisoirement les deux vis (8) qui fixent la feuille métallique (7) de la plaque de montage du rail (C) sur le MFP, élever la feuille métallique (7) de deux crans sur l'échelle de la glissière (D), puis resserrer les deux vis (8).

Remarque

Si la glissière (D) n'est pas ajustée proprement, elle ne va pas se déplacer et le retoucheur de document risque de tomber.

14. Faire glisser le retoucheur de document pour l'engager dans le pontet du loquet du MFP. Si le retoucheur de document et le MFP ne s'engagent pas correctement, effectuer le réglage de hauteur suivant sur le retoucheur de document.

13. Afloje temporalmente los dos tornillos (8) que aseguran la hoja de metal (7) de la placa de montaje de carril (C) en el MFP, levante la hoja de metal (7) con dos divisiones de la escala del carril de guía (D) y apriete los dos tornillos (8).

Nota

Si no se ajusta correctamente el carril guía (D), éste no se moverá y puede provocar que el finalizador de documentos se caiga.

14. Deslice el finalizador de documentos hasta que enganche con el cerrojo del MFP. Si el finalizador de documentos y el MFP no se acoplan de manera segura, realice el siguiente ajuste de la altura del finalizador de documentos.

13. Die zwei Schrauben (8), die das Blech (7) der Schienenmontageplatte (C) am MFP sichern, vorübergehend lösen, das Blech (7) um zwei Teilstriche der Skala von der Führungsschiene (D) aus anheben, und die zwei Schrauben (8) wieder anziehen.

Hinweis

Falls die Führungsschieneinheit (D) nicht ordnungsgemäß eingestellt ist, kann sie sich nicht bewegen und könnte dazu führen, dass der Dokument Finisher umfällt.

14. Den Dokument Finisher verschieben, um ihn mit dem Riegelschloßbausatz des MFP in Eingriff zu bringen. Wenn der Dokument Finisher und der MFP nicht richtig ineinander eingreifen, führen Sie die folgende Höheneinstellung für den Dokument Finisher aus.

13. Allentare temporaneamente le due viti (8) che fissano il foglio metallico (7) della piastra di montaggio della rotaia (C) dell'MFP, sollevare il foglio di metallo (7) di due posizioni sulla guida della rotaia (D) e serrare le due viti (8).

Nota

Se la guida della rotaia (D) non è regolata correttamente, essa non si muoverà e potrà causare la caduta della finitrice di documenti.

14. Fare scivolare la finitrice di documenti per farla innestare con il dispositivo di arresto dell'MFP. Qualora la finitrice di documenti e l'MFP non si innestino saldamente, osservare la seguente procedura di regolazione dell'altezza della finitrice di documenti.

13. 松动固定在 MFP 主机侧轨道座 (C) 的金属板 (7) 上的两支固接螺钉 (8), 在金属板 (7) 碰及导向轨道 (D) 的状态下, 抬升到第 2 个刻度的位置, 然后用两支螺钉 (8) 固定。

注意

如果没有正确调整导向轨道, 它将无法移动, 并有可能导致装订器倾覆。

14. 滑动装订器并连接于 MFP 主机的挂钩支架上。
如没有完全连接, 请按下述步骤调整装订器的高度。

13. MFP 本体側のレール取付板 (C) の板金 (7) を固定しているビス (8) 2 本をいったん緩め、板金 (7) をガイドレール (D) に当てた状態から 2 目盛り上の位置にあげて、ビス (8) 2 本を固定する。

注意

正しく調整しないと、ガイドレールが動かない。又ドキュメントフィニッシャが倒れる恐れがある。

14. ドキュメントフィニッシャをスライドさせて MFP 本体のラッチ受け板に連結させる。確実に連結しない場合は、次のドキュメントフィニッシャの高さ調整をおこなう。

Adjusting the height of the document finisher

1. Remove two screws (9) and remove the covers (10) from the document finisher (A).

2. Loosen the two screws (11) on the rear right caster of the document finisher (A). Adjust the height of the rear right caster by turning its adjustment bolt (14) using a cross-headed screwdriver so that the axis of the pin (12) of the latch catch is aligned with the marking of the slot (13) of the document finisher (A) when the document finisher (A) is joined to the MFP (viewed from the machine front). Turning the adjustment bolt (14) clockwise lifts the document finisher (A), while turning it counterclockwise lowers the document finisher (A).

Réglage de la hauteur du retoucheur de document

1. Déposer les deux vis (9) et les capots (10) du retoucheur de document (A).

2. Desserrer les deux vis (11) de la roulette arrière droite du retoucheur de document (A). Régler la hauteur de la roulette arrière droite en tournant son boulon de réglage (14) à l'aide d'un tournevis cruciforme de manière que l'axe de la broche (12) du pontet du loquet soit aligné sur la marque de la fente (13) du retoucheur de document (A) lorsque le retoucheur de document (A) est fixé au MFP (vue à partir de l'avant de la machine). Si l'on tourne le boulon de réglage (14) dans le sens des aiguilles d'une montre, le retoucheur de document (A) s'élève; si on le tourne dans le sens inverse des aiguilles d'une montre, le retoucheur de document (A) s'abaisse.

Ajuste de altura del finalizador de documentos

1. Quite los dos tornillos (9) y desmonte las cubiertas (10) del finalizador de documentos (A).

2. Afloje los dos tornillos (11) en la rueda trasera del finalizador de documentos (A). Ajuste la altura de la rueda trasera derecha girando su perno de ajuste (14) utilizando un destornillador de punta en cruz para que el eje del pasador (12) en el pestillo esté alineado con la marca de la ranura (13) del finalizador de documentos (A) cuando el finalizador de documentos (A) esté unido a el MFP (vista del frente de la máquina). Al girar el perno de ajuste (14) en la dirección de las manecillas del reloj se levanta el finalizador de documentos (A) y al girar contra las manecillas del reloj baja el finalizador de documentos (A).

Einstellen der Dokument Finisherhöhe

1. Die beiden Schrauben (9) entfernen und die Abdeckungen (10) vom Dokument Finisher (A) abnehmen.

2. Die zwei Schrauben (11) an der hinteren rechten Laufrolle des Dokument Finishers (A) lösen. Die Höhe der hinteren rechten Laufrolle durch Drehen ihrer Einstellschraube (14) mit einem Kreuzschlitzschraubenzieher so einstellen, dass die Achse des Stifts (12) der Verriegelungsklaue auf die Markierung des Schlitzes (13) des Dokument Finishers (A) ausgerichtet ist, wenn der Dokument Finisher (A) an den MFP angesetzt ist (von der Gerätevorderseite gesehen). Durch Drehen der Einstellschraube (14) im Uhrzeigersinn wird der Dokument Finisher (A) angehoben, während er durch Drehen entgegen dem Uhrzeigersinn abgesenkt wird.

Regolazione dell'altezza della finitrice di documenti

1. Rimuovere le due viti (9) e quindi rimuovere i coperchi (10) dalla finitrice di documenti (A).

2. Allentare le due viti (11) sulla ruota orientabile posteriore destra della finitrice di documenti (A). Regolare l'altezza della ruota orientabile posteriore destra ruotandone il suo bullone di regolazione (14) a mezzo di un cacciavite a croce, in modo che l'asse del perno (12) del dispositivo di arresto risulti allineato ai contrassegni del foro (13) della finitrice di documenti (A) una volta che la finitrice stessa (A) viene unita all'MFP (vista dal lato frontale della macchina). Ruotando il bullone di regolazione (14) in senso orario si solleva la finitrice di documenti (A), mentre ruotandolo in senso antiorario si abbassa la finitrice di documenti (A).

[調整装订器的高度]

1. 拆下 2 个螺钉 (9)，然后从装订器 (A) 上拆下盖板 (10)。

2. 将装订器 (A) 右后侧滚轮的两支固定螺钉 (11) 拧松。将装订器 (A) 与 MFP 主机连接，为了使 (从前面看) 挂钩承支架销 (12) 的中心与装订器 (A) 的长孔 (13) 的刻度相对准，用十字螺丝刀旋转调节用螺钉 (14)，对后右侧滚轮的高度进行调整。将调节用螺钉 (14) 往顺时针方向旋转时，可调高装订器 (A)，而往逆时针方向旋转螺钉时，则可调低高度。

[ドキュメントフィニッシャの高さ調整]

1. ビス (9) 各 2 本を外し、ドキュメントフィニッシャ (A) のカバー (10) を取り外す。

2. ドキュメントフィニッシャ (A) 右後のキャストの固定ビス (11) 2 本を緩める。ドキュメントフィニッシャ (A) を MFP 本体に連結し、前から見た時に、ラッチ受け板のピン (12) の中心が、ドキュメントフィニッシャ (A) の長穴 (13) の刻印に合うように、プラスドライバーを用いて調整用ボルト (14) を回し、右後のキャストの高さ調整をおこなう。調整用ボルト (14) を時計方向に回すとドキュメントフィニッシャ (A) が上がり、反時計方向に回すと下がる。

3. Adjust the height of the front right caster in the same manner as in step 2 so that each center of the hooking portions (16) of the latch catch is aligned with the center of the two hooks (15) on the document finisher (A) when the document finisher (A) is joined to the MFP (viewed from above).

4. Adjust the height of the left two casters in the same manner as in step 2 so that the gaps (17a) and (17b) between the document finisher (A) and the MFP are the same when the document finisher (A) is detached from the MFP.
5. Reattach the removed parts to their original positions.

3. Régler la hauteur de la roulette avant droite en procédant comme à l'étape 2, de manière que chacun des centres des parties d'accrochage (16) du pontet du loquet soit aligné sur le centre des deux crochets (15) du retoucheur de document (A) lorsque le retoucheur de document (A) est fixé au MFP (vue à partir du haut).

4. Régler la hauteur des deux roulettes gauches en procédant comme à l'étape 2, de manière que les écarts (17a) et (17b) entre le retoucheur de documents (A) et la MFP soient identiques lorsque le retoucheur de documents (A) est détaché de MFP.
5. Remettez les pièces enlevées à leur position d'origine.

3. Ajuste la altura de la rueda delantera derecha de la misma forma que en el paso 2 para que cada centro de las partes de enganche (16) de cada pestillo esté alineado con el centro de los dos ganchos (15) en el finalizador de documentos (A) cuando el finalizador de documentos (A) está nido a el MFP (vista de arriba).

4. Ajuste la altura de las dos ruedas izquierdas de la misma forma que en el paso 2 para que las separaciones (17a) y (17b) entre el finalizador de documentos (A) y la MFP sean las mismas cuando el finalizador de documentos (A) está soltado de la MFP.
5. Vuelva a instalar las piezas desmontadas en sus posiciones originales.

3. Die Höhe der vorderen rechten Laufrolle auf die in Schritt 2 beschriebene Weise einstellen, so dass die Mitte der Rasten (16) der Verriegelungsklaue auf die Mitte der zwei Haken (15) am Dokument Finisher (A) ausgerichtet ist, wenn der Dokument Finisher (A) an den MFP angesetzt ist (von oben gesehen).

4. Die Höhe der beiden linken Laufrollen auf die in Schritt 2 beschriebene Weise einstellen, so dass die Abstände (17a) und (17b) zwischen dem Dokument Finisher (A) und dem MFP gleich groß sind, wenn der Dokument Finisher (A) vom MFP abgenommen wird.
5. Die entfernten Teile wieder an ihren ursprünglichen Positionen anbringen.

3. Regolare l'altezza della ruota orientabile anteriore destra allo stesso modo descritto al passo 2, in modo che ciascun centro delle parti di aggancio (16) del dispositivo di arresto sia allineato al centro dei due ganci (15) della finitrice di documenti (A), una volta che la finitrice di documenti (A) viene unita all'MFP (vista dall'alto).

4. Regolare l'altezza delle due ruote orientabili sinistre allo stesso modo descritto al passo 2, in modo che le distanze (17a) e (17b) tra la finitrice di documenti (A) e l'MFP siano le stesse una volta che la finitrice di documenti (A) viene separata dall'MFP.
5. Rimontare le parti rimosse nelle loro posizioni originali.

3. 将装订器 (A) 与 MFP 主机连接, 使 (从上面看时) 装订器 (A) 的两个挂钩 (15) 与挂钩承支架的孔 (16) 中心相对准, 并按与步骤 2 相同的方法来调整前右侧滚轮的高度。

4. 按照步骤 2 中相同的方式调整左侧两个轮脚的高度, 使得装订器 (A) 和 MFP 主机之间的间隙 (17a) 和 (17b) 在从 MFP 主机上拆下装订器 (A) 时为相同的。
5. 卸下的部件按原样装上。

3. ドキュメントフィニッシャー (A) を MFP 本体に連結し、上から見た時に、ドキュメントフィニッシャー (A) のフック (15) 2ヶ所とラッチ受け板の引っ掛け部 (16) の中心が合うように、手順 2 と同様にして右前のキャストの高さ調整をおこなう。

4. ドキュメントフィニッシャー (A) を MFP 本体から切り離した時に、ドキュメントフィニッシャー (A) と MFP 本体の間隔 (17a) (17b) が等しくなるように、手順 2 と同様にして左側のキャスト 2 カ所の高さ調整をおこなう。
5. 取り外した部品を元通りに取り付ける。

6. After completing the installation, return to pages 7 to 8 of the installation procedure and loosen the four M4 x 6 binding screws (E) in steps 11 to 12. Then loosen the two screws (8) in step 13 and adjust the guide rail installation.

[Document finisher height adjustment method]

39. Adjust the height by turning the pin on the caster sections of the 2 slider hooking portions (13).
40. The front adjustment section is located at the lower right on the front of the document finisher.
41. The rear adjustment section is adjusted by inserting a screwdriver into the hole in plate foot R (Q) fixed to the slider.

42. Locate the adjustment pins (14).

Adjusting the pin on the front and rear sides will change the height of the document finisher.

[Méthode de réglage de hauteur du retoucheur de document]

39. Ajuster la hauteur par rotation de la broche sur les sections des roulettes des 2 côtés de suspension des glissières (13).
40. La section de réglage avant se trouve au bas à droite de l'avant du retoucheur de document.
41. La section de réglage arrière s'ajuste par insertion d'un tournevis dans le trou du pied de plateau R (Q) fixé à la glissière.

42. Localiser les broches de réglage (14).

Le réglage de la broche à l'avant et à l'arrière change la hauteur du retoucheur de document.

[Método de ajuste de la altura del finalizador de documentos]

39. Ajuste la altura girando el pasador en las secciones de rueda de las 2 partes con ganchos del deslizador (13).
40. La sección de ajuste frontal está ubicada en la porción inferior derecha del frente del finalizador de documentos.
41. La sección de ajuste trasera se ajusta insertando un destornillador en el orificio de la pata de placa R (Q) que se encuentra fijada al deslizador.

42. Ubique los pasadores de ajuste (14).

El ajuste del pasador en los lados frontal y trasero cambiará la altura del finalizador de documentos.

[Vorgehen zur Höheneinstellung des Dokument-Finishers]

39. Stellen Sie die Höhe ein, indem Sie den Stift an den Laufrollenbereichen der 2 Schiebereinheiten (13) verdrehen.
40. Der vordere Einstellbereich befindet sich unten rechts an der Vorderseite des Dokument-Finishers.
41. Der hintere Einstellbereich wird eingestellt, indem man einen Schraubendreher in die Öffnung des am Schieber angebrachten Plattenfußes R (Q) steckt.

42. Lokalisieren Sie die Einstellstifte (14).

Durch Verstellen des Stifts an der Vorderseite bzw. Rückseite lässt sich die Höhe des Dokument-Finishers korrigieren.

[Metodo di regolazione altezza della finitrice di documenti]

39. Regolare l'altezza ruotando il perno sulle sezioni delle ruote orientabili delle 2 porzioni (13) al lato di aggancio dello scivolo.
40. La sezione di regolazione anteriore si trova a destra in basso sulla parte anteriore della finitrice di documenti.
41. La sezione di regolazione posteriore viene regolata inserendo un cacciavite nel foro nel piedino della piastra R (Q) fissato allo scivolo.

42. Individuare i perni di regolazione (14).

Regolando il perno sui lati anteriore e posteriore, si cambierà l'altezza della finitrice di documenti.

[装订器高度调节方法]

39. 通过旋转 2 个滑板卡扣部 (13) 轮脚部分的销钉来调节高度。
40. 前侧调节部位位于装订器正面的右下部。
41. 将螺丝刀插入固定至滑板的板脚座 R (Q) 的孔中，以调节后侧调节部。

42. 确认调节销 (14) 的位置。

调节位于前、后侧的销钉可改变装订器高度。

[ドキュメントフィニッシャ高さ調整方法]

39. スライダー取付側 2ヶ所のキャスタ部のピンを回して調整する。(13)
40. 前側の調整部は、ドキュメントフィニッシャ正面の右下部にある。
41. 後側の調整部は、スライダー部固定のプレートフット R(Q) の穴にドライバを挿入し調整する。

42. 調整ピン(14)の位置を確認する。

前側と後側の 2ヶ所の調整でドキュメントフィニッシャの高さが変わる。

43. In the case of the left illustration, turning the pin to the right allows the caster's axle holder to be movable in the direction of the arrow, enabling the height of the document finisher to be lowered.
44. In the case of the right illustration, turning the pin to the left allows the caster's axle holder to be movable in the direction of the arrow, enabling the height of the document finisher to be raised.

The default position is setting for document finisher to position above.

43. Dans le cas de l'illustration gauche, une rotation de la broche vers la droite permet de faire tourner le support d'axe de la roulette dans le sens de la flèche et d'abaisser la hauteur du retoucheur de document.
44. Dans le cas de l'illustration droite, une rotation de la broche vers la gauche permet de faire tourner le support d'axe de la roulette dans le sens de la flèche et d'élever la hauteur du retoucheur de document.

La position par défaut du réglage du retoucheur de document est la position haute.

43. En el caso de la ilustración de la izquierda, si se gira el pasador hacia la derecha, el soporte del eje de la rueda se moverá en la dirección que muestra la flecha, permitiendo disminuir la altura del finalizador de documentos.
44. En el caso de la ilustración de la derecha, si se gira el pasador hacia la izquierda, el soporte del eje de la rueda se moverá en la dirección que muestra la flecha, permitiendo aumentar la altura del finalizador de documentos.
- La posición predeterminada es ajustar el finalizador de documentos a la posición anterior.

43. Wie aus der Abbildung links zu ersehen, kann man durch Drehen des Stifts nach rechts den Achshalter der Laufrolle in der Pfeilrichtung verstellbar machen, wodurch die Höhe des Dokument-Finishers gesenkt werden kann.
44. Wie aus der Abbildung rechts zu ersehen, kann man durch Drehen des Stifts nach links den Achshalter der Laufrolle in der Pfeilrichtung verstellbar machen, wodurch die Höhe des Dokument-Finishers angehoben werden kann.
- In der Grundeinstellung befindet sich der Dokument-Finisher in der obersten Position.

43. Nel caso dell'illustrazione sinistra, ruotando il perno a destra si permette al supporto asse della ruota orientabile di spostarsi nella direzione della freccia, consentendo l'abbassamento in altezza della finitrice di documenti.
44. Nel caso dell'illustrazione destra, ruotando il perno a sinistra si permette al supporto asse della ruota orientabile di spostarsi nella direzione della freccia, consentendo l'innalzamento in altezza della finitrice di documenti.

La posizione di default per la finitrice di documenti è impostata alla posizione più alta.

43. 如果出现左图所示情况,则向右转动销钉,以便能够沿着箭头方向移动轮脚的轴固定器,从而降低装订器高度。
44. 如果出现右图所示情况,则向左转动销钉,以便能够沿着箭头方向移动轮脚的轴固定器,从而升高装订器高度。

装订器的初始位置设定为最高位置。

43. 左図の場合、ピンを右方向に回転させることで、キャストの軸保持部が矢印方向に可動し、ドキュメントフィニッシャの高さを下げることが出来る。
44. 右図の場合、ピンを左方向に回転させることで、キャストの軸保持部が矢印方向に可動し、ドキュメントフィニッシャの高さを上げることが出来る。
- 初期位置はドキュメントフィニッシャが最上位になるように設定されている。

If the pawl (27) is not securely engaged with the concave section, the top cover (7) is loose, which may cause incorrect operation of the document finisher.
17. Close the upper cover (3) and the tray C (4) which were opened in step 2.

Installation du capot

16. Engager le cliquet (27) du finisseur de document dans la partie concave (28) de l'arrière du capot supérieur (7) retiré à l'étape 3. Ensuite, réinstaller le capot supérieur (7) en serrant le levier de relâchement du finisseur de document (6) à l'aide de quatre vis (5).
Si le cliquet (27) n'est pas bien engagé dans la partie concave, le capot supérieur (7) est lâche, ce qui peut entraîner un fonctionnement incorrect du finisseur de document.
17. Refermer le capot supérieur (3) et le bac C (4) ouverts à l'étape 2.
