**Model:**

LaserBase MF5630  
LaserBase MF5650  
LaserBase MF5730  
LaserBase MF5750  
LaserBase MF5770

**Ref No.:**

MF5650-008  
(SH-T01-OLD-10029-01)

**Date:**

July 2005

---

**Location:**

External Covers, Panels, etc.

**Subject:**

Newly setting the label to the rear cover for preventing the cassette paper sensor lever from breaking

**SPEED:**

SH-LD-0035-01

**Destination:**

F14-5691 (EUR, GB, FR), F14-5692 (EUR, GB, FR), F14-6591 (EUR, GB, FR, AU, CN), F14-6592 (GB, FR, AU, CN, KR), F14-6593 (GB, FR, AU, CN, KR)

**Detail:**

## &lt;Symptom&gt;

Wrongly detect the presence or absence of paper in the cassette

## &lt;Cause&gt;

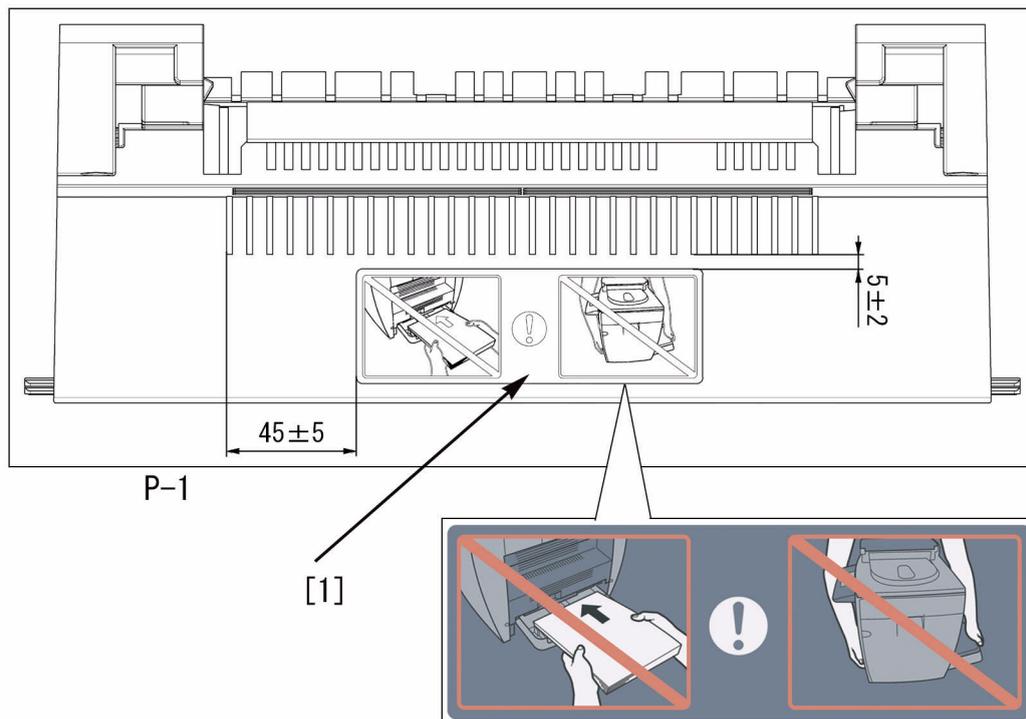

In some cases, the edge of paper comes to contact with the cassette sensor flag and the shaft of the flag is distorted and damaged when operators place paper in the cassette from the rear with the state that the cassette is set to the main body.

Depending on the flag position when it is damaged, the sensor always detects the presence of paper or the absence regardless of actual situations.

## &lt;Factory Measure&gt;

Newly set the rear cover label (FC5-8110) and affix it to the rear cover in order to call attentions to users so as not to place paper into the cassette from the rear with the state that the cassette is set to the main body.

P-1 New type REAR COVER

[1] REAR COVER LABEL

**Service work:**

When the symptom above occurs, replace the cassette paper sensor lever and affix the rear cover label (FC5-8110) to the rear cover. Or, as new type rear cover (FL2-1753) is set, replace the rear cover with the new one with label (FC5-8110).

**Service parts:**

| No |     | Part name        | Part No.     | Qty   | Stock | Compati-<br>bility | Available<br>from | Fig<br>No. |
