

Model:

LaserBase MF6530
LaserBase MF6540PL
LaserBase MF6550
LaserBase MF6560PL
LaserBase MF6580PL

Ref No.:

MF6500-005
(F9-T01-M00-10015-01)

Date:

September 2006

Location:

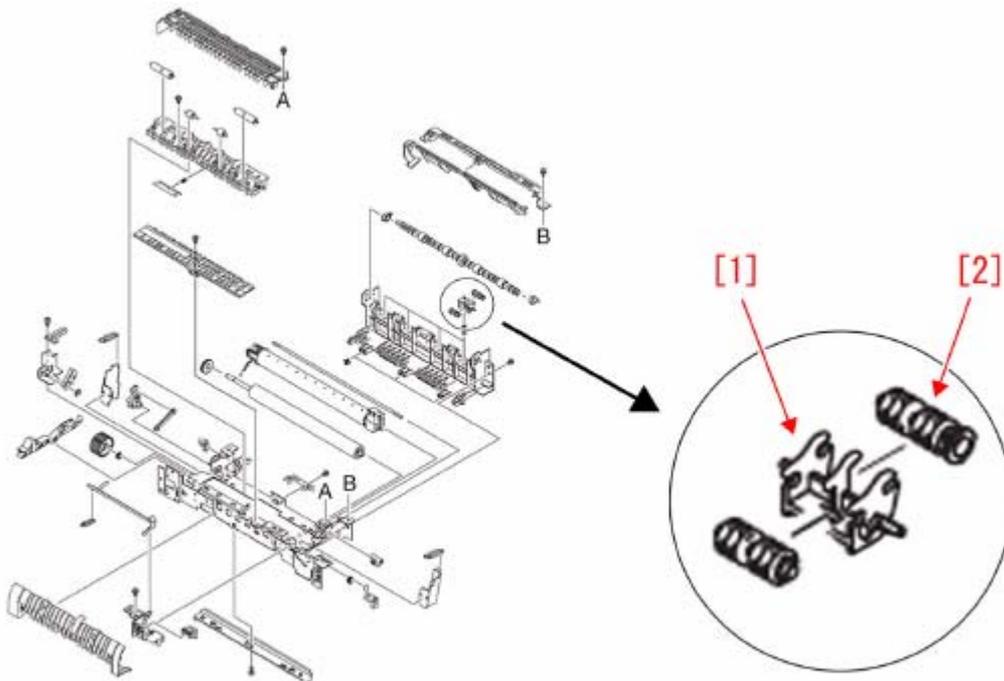

Fixing Assembly

Subject:

Preventing the outer paper delivery roller from coming off

Detail:

In order to make the outer paper delivery roller [2] of the fixing assembly less likely to come away from the roller holder [1], the shape of the roller holder is modified (P-2) so that the direction in which paper is sent after fixing will be opposite to the one in which the outer paper delivery roller comes away.

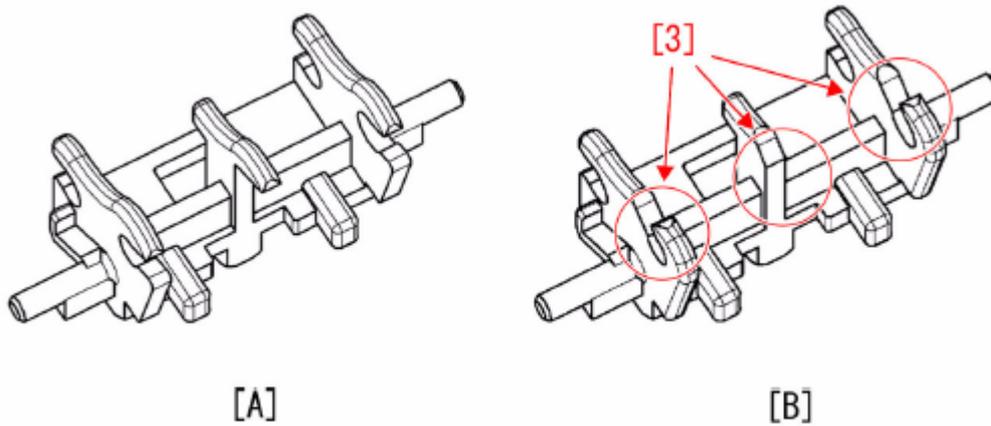

P-1

P-1 Fixing assembly

[1] Roller holder

[2] Outer paper delivery roller

P-2

P-2 Roller holder

[3] Locations where the shape is modified

[A] Old type

[B] New type

Points to note about service work:

Although the attachment/ detachment direction of the outer paper delivery roller varies depending on the type of the roller holder, the position where the roller is mounted is the same. Therefore, coexistence of the new and old roller holders will cause no functional problem.

Service parts:

No.	Part No.	Part name	Q'ty	Stock	Compa-tibility	Available from	Fig. No.
1	Old	FC6-7502-020	HOLDER, ROLLER	4 > 4	F		810
	New						

Affected machines:

To be informed as soon as identified.
