
Model:

LaserBase MF6530
LaserBase MF6540PL
LaserBase MF6550
LaserBase MF6560PL
LaserBase MF6580PL

Ref No.:

MF6500-017 Rev. 1
(F9-T01-M00-10035-02)

Date:

February 2008

Location:

Internal Component 1

Subject:

Point to note for replacing compression spring (rear)

Detail:

As for the machines listed in “Affected Machines” below, for the purpose of ensuring parallelism of print images, three kinds of springs (i.e., blue, red, and silver) are prepared as the rear compression spring [1] so that a worker can choose one of them according to their pressure at the time of replacement. In case that the wrong spring is attached, the parallelism of print images may be poor. When replacing the rear compression spring, be sure to use one of the same color as the one the machine has long used. These 3 kinds of rear compression springs will be unified and newly set up as the compression spring set (FM3-2397).

P-1 Transfer unit

[1] Compression spring (rear)

Affected Machines:

LaserBase MF6530 EU1	SNF02001 and later
i-SENSYS MF6530 EU1	BAC02001 and later
