HARDWARE

| **Model:**	**Ref No.:**
LaserBase MF6530	MF6500-004 Rev. 1
LaserBase MF6540PL	(F9-T01-M00-10009-02)
LaserBase MF6550	**Date:**
LaserBase MF6560PL	November 2006
LaserBase MF6580PL	

Location:

Registration Assembly

Subject:

Points to note when replacing the tension spring and registration frame

Detail:

When assembling the machines with the following serial numbers, an adjustment was performed on each of them to ensure their print accuracy. Therefore, the position [3] on the registration frame [2] in which the tension spring [1] of the registration assembly (P-1) is mounted varies depending on the machine. If the tension spring is mounted in a different position at the time of replacing the tension spring or the registration frame, the parallelism of print images may suffer.

P-1

P-1 Registration assembly   [2] Registration frame
[1] Tension spring   [3] Mounting position of the tension spring

Service work: ⟵ **Rev. 1**

When attaching the tension springs to the registration frame, be sure to pay attention to the following:

a. When reusing the tension springs or replacing to springs of the same color, attach them to the positions where these/ the old ones were at the time of factory shipment.

b. When attaching the tension spring R (red) in replacement of the tension spring (silver) in the rear side (i.e. in the left side of the registration assembly shown in P-1), viewing from the left door side, attach it one position behind where the silver one was at the time of factory shipment.

Service parts: ⟵ **Rev. 1**

No.		Part No.	Part name	Q'ty	Stock	Compati-bility	Available from	Fig. No.
1	O	FU6-2414-000	SPRING, TENSION	2 > 1	F	N		321
	N	FU6-2416-000	SPRING, TENSION R	0 > 1	D	Y		

Affected machines:

LaserBase MF6530 (EU1)	SNF20001 and later
LaserBase MF6550 (EU1)	SNG20001 and later
