

<b>SB Number:</b>	<b>SB 3JY-002</b>	<b>Creation Date:</b> 01/06/2007
<b>Subject:</b>	<b>Firmware change, new model compatibility chart</b>	
<b>Model:</b>	<b>DF-710/730, DP-710</b>	

The F/W is changed to support the new models, specifically the KM-C4035E.

**NOTE:**

The below table describes the compatibility between current and new machines/accessories. It becomes clear that only the new DF-710/730 and DP-710 are compatible with the new KM-C4035E. The new DF/DP models are compatible with all the current and new colour MFP's, whereas the current DF/DP range will cover all but one model; the KM-C4035E.

	Compatible with present model			Support for new model		
Main body to which it can be installed	KM-C2520/C3225/C3232 KM-C2525E/C3232E			KM-C2520/C3225/C3232 KM-C2525E/C3232E/C4035E		
Label on the outer carton	<b>DF-710</b> Document Finisher	<b>DF-730</b> Document Finisher	<b>DP-710</b> Document Processor	<b>DF-710</b> Document Finisher	<b>DF-730</b> Document Finisher	<b>DP-710</b> Document Processor

**Contents of change in firmware**

	Model	Item	Contents
1	DF-710 DF-730 DP-710	Support for new model (KM-C4035E)	Changed to support cycle speed of the KM-C4035E
2	DF-710	The timing of paper holding solenoid has been adjusted	In order to reduce the sound of the paper holding lever hitting the main tray, the operation timing of the paper holding solenoid has been changed as follows
3	DF-710	Measure against JAM 88 occurring due to 3 sheets monochrome A4 & 2 staples (JAM88: Main tray eject JAM)	There might be the possibility that JAM88 might occur when copying 3 sheets Monochrome A4 copy & 2 staples continuously. Therefore, it is corrected.
4	DP-710	The paper feeding timing at Auto Selection mode has been changed.	On the Auto Selection mode, there is a possibility that small size original is detected as large size original and paper is output with half of the image printed on large sized paper. Therefore, it is corrected.
