Service Bulletin

SB Number:	**SB 2DD-004**	*Creation Date:*	**23/02/2005**
Subject:	Main firmware upgrade (version 2DD_2000.003.003)		
Model:	**FS-1018MFP**		

Please be informed that the main firmware has been upgraded as follows.

Main: Version 2DD_2000.003.003

CONTENTS OF CHANGES

	Item	Remarks
1	Changing the default value (machine status: left margin)	Change the default value of left margin from "571" to "579".
2	Adding the description of 'seconds' to the file name created by date and time.	Add the seconds to the file name when the file name for the job name such as Scan To E-mail, panel job name and job end report is created by date and time.
3	Correcting the problem when selecting the custom size in printer mode.	After setting the custom size on operation panel, even if custom size output is selected in printer mode, the image is always made at maximum size. Therefore the change is made so that the image is output by the custom size designated on operation panel.
4	Correcting the problem that cassette 2 cannot be selected when using Mini driver	F/W has been changed to correct the phenomenon.
5	Correcting the problem that, if large quantity of data are sent from FTP client, the output might be stopped	F/W has been changed to correct the phenomenon.
