

SB Number:	SB 2GM-006	Creation Date: 20/09/2007
Subject:	<i>Firmware upgrade, Ver. 007.001 correcting CF2FF error</i>	
Model:	FS-1118MFP	

System firmware is upgraded as follows.

Description of changes:

1. Correcting CF2FF error indicated along with “power off” message which may occur if certain PCL data is printed;
2. Correcting the incorrect display of “(double quotation mark) which is indicated after registering in POP3 User 2 and USER 3 through Command Center.
3. Correcting Cassete2 checked as available by default which may occur when executing auto configuration of the printer driver.

Type	Program number	Check SUM	Version
Control	2GM_2000007001	3796	007.001

※Due to change in the NVRAM mapping, custom setting like country setting and network setting is reset if firmware is downgraded from 2GM_2000.006.001 or newer to version older than 2GM_2000.006.001 or before.

Machine serial number information:

All machines produced from September 2007 onwards have the abovementioned formware version installed.
