

| | | |
|-------------------|--|----------------------------------|
| SB Number: | SB 2C9-036 | Creation Date: 18/02/2009 |
| Subject: | Black band through the image | |
| Model: | KM-1620/2020/1635/2035/1650/2050/2550 | |

| | |
|-------------------|--|
| Phenomenon | A black band may occur on the print-out. |
|-------------------|--|

| | |
|--------------|--|
| Cause | The film terminal main may condensate under the condition of a environment with a high degree of temperature/humidity. This may then result in leaking of the electrical charge at the edge section of the terminal main. |
|--------------|--|

| | |
|-----------------|--|
| Solution | Improve the isolative capability of the terminal main, by adding a film (sheet terminal main 302FT26050) to the terminal main. |
|-----------------|--|

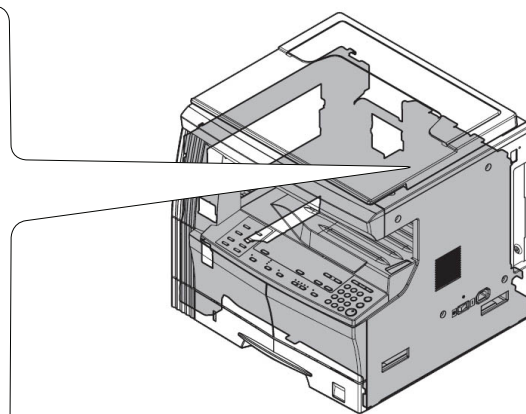

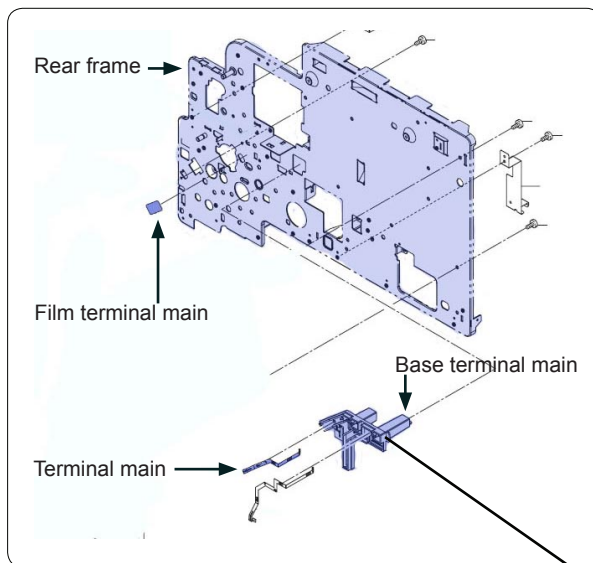

Phenomenon; A black band appears on the image

| | KM-1620/2020/1635/2035/1650/2050/2550 | November 2008 production |

Cause; Under high temperature/humid environment condition, electrical charge may leak from the main charger.

Sheet terminal main 302FT26050 details

Solution; Add sheet terminal main at the back of the base terminal main
