Subject:	Note when executing U473 “Set Density (Emit Time/Dot)”	
Model:	KM-C2525E/C3232E/C4035E	

Phenomenon	After adjusting U473 “Set Density (Emit Time/Dot)” calibration is not performed so no change in the image quality.
-------------------	--

Cause	If the fixing temperature is 50° or higher calibration will not be performed.
--------------	---

Solution	<p>Take the following steps to solve this problem:</p> <ol style="list-style-type: none"> 1. Change “Set Density (Emit Time/Dot)” in U473 (Adjusting laser power output). 2. Manually perform colour calibration. System menu User adjustment Colour calibration 3. Perform U410 halftone adjustment.
