

KYOCERA Service Bulletin

SB Number:	SB 2H0-023	Creation Date: 12/01/2010
Subject:	No response from the touch panel	
Model:	KM-2560/3060, TASKalfa250ci/300ci/400ci/500ci	

Phenomenon	The touch panel may not respond.
-------------------	----------------------------------

Cause	When too much pressure is used operating the touch panel, it may be possible a gap is created between the operation panel cover and the touch panel. Foreign particles may enter the gap, causing the touch panel to stop responding.
--------------	--

Solution	Attach the sheet tablet protect 302H005A20 to the touch screen at the operation panel.
-----------------	---

Sheet tablet protect specifications

Material : PET film
 Thickness : 0.075mm
 Colour : Transparent
 Blue marked part : Tape
