

<b>SB Number:</b>	<b>SB 2G1-008</b>	<b>Creation Date:</b> 11/05/2007
<b>Subject:</b>	<b>Firmware upgrade, Supporting new BAM/Energy Star standards etc.</b>	
<b>Model:</b>	<b>FS-9130DN/9530DN</b>	

### Contents of change

Item	Contents
1 Supporting new standard of the Energy Star Program and BAM	To support the new standard of the Energy Star Program and BAM, the default settings have been changed as follows: -The time to shift low power mode 10 minutes → 9 minutes
2 Ejecting to the mail box using PCL command	Based on requests from some customers, ejecting to mail box (MT-710) using PCL command is now possible.
3 Printing on the wrong page	If an internal process such as switching cassette or toner supply interrupts continuous printing, data on the the leading edge of one page may print on the leading edge of the following page. Even though this rarely occurred, it was corrected.

### Firmware specifications

Type	Program number	Check SUM	Version	Remarks
ENGINE	S2G1_1000.008.001	E637	008.001	(please check <a href="http://www.kmissupport.com">www.kmissupport.com</a> )
LANGUAGE	Optional language F/W		003.001	
MAIN	S2G1_3000.004.003	FB40	004.003	← New upgrade

When upgrading firmware or replacing a board, please upgrade 3 types of firmware (MAIN, LANGUAGE and ENGINE) to the latest version at the same time.

### Serial number information:

All machines produced in/from April 2007 onwards will have the abovementioned firmware (or newer, once it is available) installed.
