SB Number:	**SB 2G1-024**	Creation Date: **26/04/2010**
Subject:	*Compatibility between older firmware and newer flash memory*	
Model:	**FS-9130DN/9530DN**	

Because the commonly used Spansion flash memory has become difficult to obtain, we changed the common type to Numonyx flash memory. The firmware mentioned below has been upgraded to support the Numonyx flash memory. Therefore please unsure that the firmware is at least upgraded to the versions mentioned in the table below.

When the system firmware does not support the flash memory on the main board, the flash memory can not be recognized and the machine can not operate. Older flash memory then Spansion is supported by later firmware versions.

Firmware version supporting the Numonyx flash memory

Model	Firmware type	Supporting version	Service bulletin	Affected part
FS-9130DN/9530DN	Main	S2G1_3000.013.001	2G1-023	No. 1

Parts

No.	Old Parts No.	New Parts No.	Description	Q'TY Old	Q'TY New	Interchange-ability Old	Interchange-ability New	SP
1	302G101040 2G101040	302G101041 2G101041	CODE DIMM PWB ASS'Y WITH SOFTWARE	1	1	O	O	O

Classification	☐Entire stock rework	☐In-field modification at next visit	☒In-field modification by case	☐No modification necessary
Field measure	Please confirm the firmware version of the installed board by printing out the status page/service status page, before downloading the firmware to prevent downloading of the old firmware.
